The purpose of the project:

The existing book, which covers the period from the earliest periods of the history of Uzbek literature up to the 13th century, is relatively old and the information provided in it is not up to date. Thus, it is extremely necessary to create a holistic monograph covering all periods. Due to this need, the project was organized. In accordance with its purpose - the monograph "Study of Turkish written sources from ancient times to the 13th century" was written on the basis of researches of the oldest written sources.

Main objective:

It should be noted that the Turkic-Run written toshbitiks (rock inscriptions), in particular, the toshbitiks (rock inscriptions) found in Uzbekistan, are of great importance for the studies of ancient written literature, folklore, and the spiritual and educational process in general. The project will pay special attention to the toshbitiks (rock inscriptions) found in Uzbekistan. Opinions on the general condition of these stones as well as their decipherment will be expressed

Expected result:

The project members will publish 1 monograph on the history of Uzbek literature (Prof. N. Rakhmonov's monograph "Nourished by history"; volume 7 ; 118 pages of research on the project topic, included in the monograph), more than 50 scientific articles have already been published. The main part of this monograph is based on the research and analysis of Turkish written and oral sources. The general content of the goals and objectives of the project concludes that the creation of a monograph "Study of Turkish written sources from ancient times to the 13th century" is relevant and has sufficient scientific potential.

Scope :

The monograph is a valuable resource for philological faculties of higher education, literary scholars, doctoral students and researchers.

Implementation:

Prepared for publication as a part of a scientific-practical project for the publication of the monograph PZ-20170927147- "Study of Turkish written sources from ancient times to the 13th century" for 2017-2020. During the project 1 textbook, 1 complex, 3 monographs were published.
